# ERHARDT SD

## THE PERFECT AWNING WITH HIGH-END TECHNOLOGY

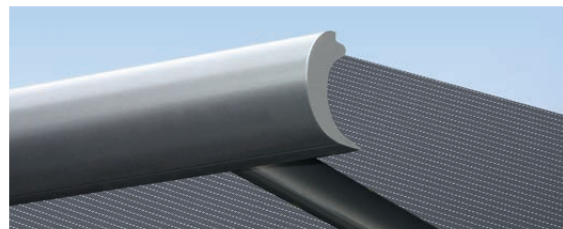

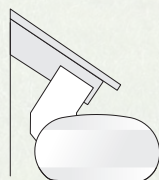

### Recommended equipment for the Erhardt SD:

- We recommend the **double awning** with a projection length of up to 170 cm for ideal protection. The double awning gives you not only perfect sun protection even when the sun is low, but also protection from the curious glances of others. With the Soltis fabric collection, you will be able to see out, but others cannot see in.
- We recommend a **motor** with a **remote control** for the best in operating convenience. More safety is provided by the **oscillation sensor** which closes the awning automatically in strong winds.

## ERHARDT SD – The versatile awning for every requirement

- The fabric and the mechanism are perfectly protected within the closed housing of the cassette awning. This ensures ideal protection from the elements.
- The internal gutter is a further sophisticated detail.
- Even with a low-profile installation height of only 15 cm, the ERHARDT SD is characterised by exceptional stability and torsional stiffness.
- The ERHARDT SD is particularly robust making it suitable for larger areas as well.
- The timeless shape of the cassette has a very light and elegant appearance in spite of its high loading capacity.
- A valance can be ordered separately.
- The ERHARDT SD is also available as a double awning. Both the vertical awning and the main awning can be operated either by a crank or a remote control motor.
- Durable materials and high-quality craftsmanship form the basis for sophisticated functionality.
- A large selection of additional equipment: Ask your ERHARDT dealer to get valuable tips.
