

# ERHARDT Z

SOPHISTICATED VERTICAL  
SUN AND PRIVACY PROTECTION AWNING WITH  
CONCEALED ZIPPER SYSTEM

 **ERHARDT  
MARKISEN**

Mehr. Freude. Leben. Zuhause.

### Recommended equipment for the ERHARDT Z:

- We recommend the **Fibreglass screen collection** from among our large selection of fabrics. The semi-transparent mesh offers optimal privacy and sun protection. The high level of transparency makes the fabric unobtrusive and pleasant. The sophisticated designs are available in a broad range of colours.
- The motor drive with **remote control** is ideal for vertical cassette awnings. You can adjust your environment for your comfort while remaining seated.

# ERHARDT Z

## DESIGN, FUNCTION AND PROTECTION FOR THE HIGHEST REQUIREMENTS

### ERHARDT Z – A zipper system with added value

- In the ERHARDT Z, the fabric is guided in a special, unobtrusive rail system by means of a welded-on zipper system which prevents the formation of an annoying light gap between the awning fabric and the guide rail.
- This creates significantly improved wind stability (with facade mounting, up to wind force 6), and is ideal against draughts or in windy weather.
- This also makes larger unit dimensions possible.
- Fibreglass screens are available in two different fabric styles (one has a different appearance on the front and back)
- The vertical awning is not visible from inside when retracted: The end bar is completely retractable.
- The unit operates with a motor drive; optionally available with a remote control.
- The ERHARDT Z offers many benefits as an ideal and easy-care way of providing additional protection for challenging facade solutions (e.g. windows or large glass surfaces) as well as for terraces and balconies.
- Your ERHARDT dealer is available to answer your questions.

## Optional additional features of the ERHARDT Z

- Remote control (tip!)
- Automatic wind and sun sensors

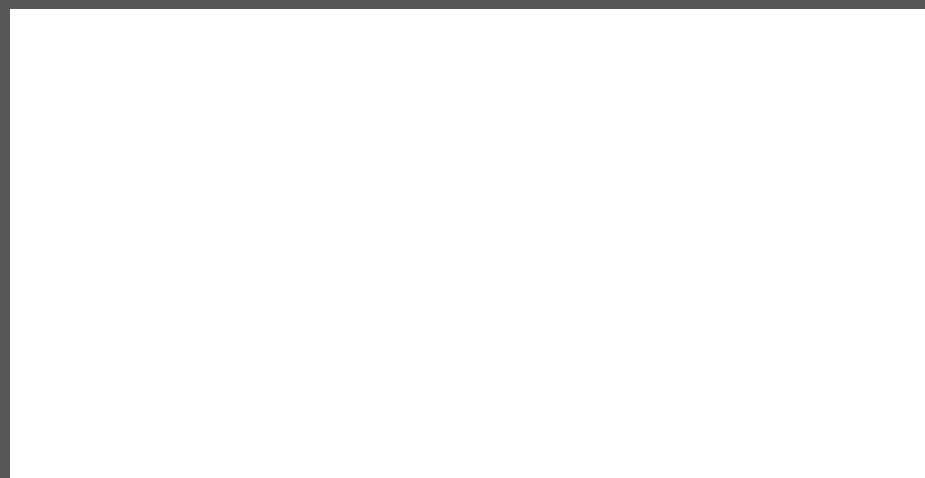

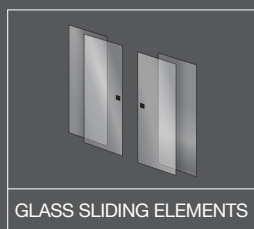

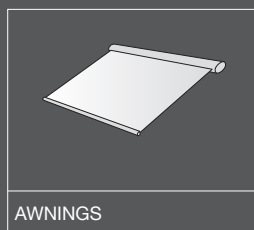

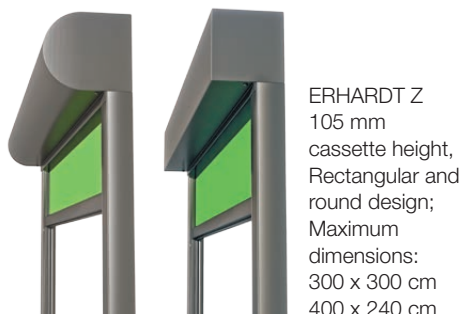

## TIP! ERHARDT terrace roof

When combined with an ERHARDT terrace roof, you will enjoy not only more privacy on your terrace, but also protection from the elements such as wind and rain.

## ERHARDT Soltis awning fabrics

This collection consists of PVC-coated fibreglass mesh and stands out with its many attractive properties:

- High transparency, visual contact is retained
- In single or two-colour fabric styles or with different accents on the outside and the inside
- Repels dirt, washable and non-fading
- A large colour selection
- Privacy and sun protection
- Optimal air circulation creates a pleasant climate feeling – no heat buildup
